

SEAWORLD PARKS UNVEILS TWO NEW ATTRACTIONS FOR FLORIDA IN 2018

2018 will see SeaWorld Parks & Entertainment welcome two new attractions to its existing Florida line up to expand their ever-growing ride portfolio. From the roller coaster thrills of Mako, Manta and Kraken to the water flume fun of Journey to Atlantis, Infinity Falls at SeaWorld Orlando and Ray Rush at Aquatica will soon join the park's famed attractions as must-do experiences.

SEAWORLD ORLANDO IS READY TO RUSH THE RAPIDS WITH INFINITY FALLS

SeaWorld Orlando's latest world-class attraction, Infinity Falls, is set to debut in summer 2018. Thrilling rapids will roar through the brand-new rainforest river experience, while adventure-seeking guests plunge down the world's tallest river rapid drop.

Inspired by the rainforests of South America and the flowing rivers found within, each raft will twist and turn through a lush jungle environment as guests experience the feel of exhilarating Class IV rapids. A unique vertical elevator will lift each raft for a dramatic launch into the river, 40 feet below.

Infinity Falls will be the centerpiece of a newly themed surrounding area, fully immersing guests in a rainforest canopy. After riding the rapids on Infinity Falls, the entire family can explore the village and take part in interactive experiences that combine play with education to create a positive impact on freshwater ecosystems. SeaWorld's Animal Ambassadors will also provide up-close encounters with animals native to South America.

RAY RUSH

A brand-new family raft slide is splashing into Aquatica, SeaWorld's Waterpark in spring 2018. Ray Rush promises to be a fully-loaded water adventure which will combine three unique slide elements, never before seen at Aquatica, into one action-packed attraction the entire family can enjoy together.

At nearly 60 feet tall, Ray Rush is where family and friends can take on three exciting thrills as they slide, splash and soar like never before. First, riders will be launched at 33 feet per second with water jets designed to propel rafts into the first of several enclosed tube sections. Next, riders will swirl into a colossal translucent sphere which spins the raft around the slide walls before entering another enclosed tube section. Finally, riders will drop into an open-air halfpipe that resembles the shape of a manta ray. Rafts will soar back and forth on the wings of the manta before entering the final enclosed tube section that ends with a splash.
